

Royal Purple of Canada Organ and Tissue Donation Petition

We the undersigned support and wish to promote the following:

- 1.Create a VOLUNTARY DATA BASE – where those wanting to have their names added as potential donors can do so. This data would include all donor and potential recipient info and the vital data needed, blood type and related health information. (This same data base could be extended to cover ALL medical conditions for all patients who are willing to sign on).**
- 2.LEGISLATION – the laws changed to honour the requests of those in the data base, and not require their families to volunteer the organs.**
- 3.NATIONAL REGISTRY –a Canadian registry for all the Voluntary Data Bases created, accessible country wide for all patients both needing medical attention, and those willing to assist by way of donation.**
